SMALL STEPS...BIG CHANGES

In 2009, six Premature Infant Health Summits were conducted to address and discuss the many issues facing premature infants. Since that time many stakeholders have developed programs and initiatives, all with the goal of improving the care of premature infants.

This year we will talk about the many small steps that have been taken and, with everyone's involvement, can lead to big changes in the lives of premature infants.

* See Agenda on Page 2

MedImmune fully supports and abides by the PhRMA Code on Interactions with Health Care Professionals. As such, this program is open to invitees only. Guests and spouses are not permitted at this meeting. If you are a health care professional and/or Federal, State or institution employee, you may be subject to laws, regulations or rules which prohibit or limit or require the disclosure of meals or items of value you may receive.
